

# Flexagon Instructions

A fun interactive homemade paper toy.

## MATERIALS

- Printer paper or cardstock
- Scissors
- Glue
- Crayons/Colored pencils

Watch the Instructional Video at [youtube.com/wastemanagement](https://www.youtube.com/wastemanagement)

## INSTRUCTIONS

- 1** Print out the flexagon on the last page of these instructions.

- 2** Color the images on the template.

- 3** Cut around the edges of the template, keeping the "GLUE" and "END TAB" sections plain white.

- 4** Carefully and sharply fold along each dashed diagonal line.

- 5** Make five vertical folds, creating a crease between each top and bottom arrow.

- 6** Connect the end dots together while shaping the flexagon.

- 7** Add glue to tabs marked "END TAB" and carefully insert it into the opposite end of the flexagon then gently press together.

- 8** Add glue to tabs marked "END TAB" and gently press together.

- 9** Let glue dry for at least two minutes.

- 10** Have fun with your new WM flexagon!

*Congrats!*
